

MANAS KASAUDHAN

Web Developer

| manaskasaudhan1808@gmail.com | 9250781266 | Noida |

SUMMARY

A full stack developer who approaches engineering the way a chess player approaches the board — thinking several moves ahead, strategically architecting systems before a single line of code is written. My work lives at the intersection of clean architecture, performance optimization, and real-world impact. I don't just ship features — I build systems designed to scale, with codebases that stay maintainable as they grow.

WORK EXPERIENCE / INTERNSHIP

Web Developer Intern , Zaalima Development Pvt. Ltd

May 2026– Present

- Building responsive web applications and improving user experience. Gained hands-on experience in front-end and back-end development, collaborated with a team, and strengthened skills in modern web technologies and real-world project workflows.

Full Stack Developer Intern , Codec Technologies

Mar 2026 – April 2026

- Contributed to multiple production-level applications
- Implemented backend API endpoints serving 10,000+ daily requests
- Developed reusable React components improving development speed by 25%
- Optimized database queries reducing server response time by 40

EDUCATION

Bachelor of Science

2022–2025

Dr.Ram Manohar Lohia Awadh University

- Major in Animal Zoology
- Final CGPA: 7.6

Masters in COMputer Applications

2025–2027

Galgotias University

- Current CGPA: 8.4

KEY SKILLS

• Languages:

- JavaScript/TypeScript
- Python
- Java
- SQL

• Frontend:

- React.js
- HTML5 & CSS3
- Responsive Design

• Backend:

- Node.js
- Express.js
- REST APIs

• Databases:

- MongoDB
- MySQL

• Tools & Platforms:

- Git & GitHub
- VS Code

PROJECTS

1. AnatomyMaster – Human Anatomy Educational Website

- Built a fully responsive, multi-page anatomy learning website using HTML, CSS, JavaScript, and SVG. Developed 5+ interactive SVG diagrams, 20+ structured content sections, and an interactive quiz module to enhance engagement. Achieved 100% device responsiveness and improved user interaction with intuitive UI, quick facts, and detailed explanations. Opensource (MIT Licensed) for educational use

2. LocoWeather– Weather Forecast Platform

- Developed a responsive weather application using JavaScript, Node.js, and OpenWeatherMap API with MongoDB caching. Implemented 8+ features including geolocation detection, multi-day (5–10 days) forecasts, and detailed weather metrics. Reduced API calls by 60% using caching and optimized performance with TTL indexing. Achieved smooth 60fps animations and seamless cross-device responsiveness.

3. ResuScan-ai – AI Resume Analyzer

- Developed a responsive weather application using JavaScript, Node.js, and OpenWeatherMap API with MongoDB caching. Implemented 8+ features including geolocation detection, multi-day (5–10 days) forecasts, and detailed weather metrics. Reduced API calls by 60% using caching and optimized performance with TTL indexing. Achieved smooth 60fps animations and seamless cross-device responsiveness.
